

Accessibility Statement (WCAG 2.2 A/AA)

Accessibility statement for Community Hub Website

This website is designed to be accessible and usable by as many people as possible. We aim to meet the requirements of the Web Content Accessibility Guidelines (WCAG) 2.2 level A and AA.

We use automated and manual testing to identify and resolve accessibility issues. Testing has been carried out using the IBM Accessibility Checker (version 7.3).

How we tested this website

We have tested this website using:

- IBM Accessibility Checker (version 7.3)
- Manual keyboard navigation testing
- Screen reader compatibility checks
- Browser-based accessibility inspection tools

All critical accessibility issues identified have been fixed.

Known accessibility issues

1. Needs review issues

Some items flagged by automated testing tools require manual review to determine whether they are actual accessibility barriers. These may include:

- Context-dependent labels
- Structural or semantic recommendations
- Potential false positives from automated testing

These issues do not necessarily represent WCAG violations.

2. Recommendations

Some findings are classified as recommendations, which are best practice improvements rather than compliance failures. These may include:

- Additional ARIA attributes

- Enhanced descriptive link text
- Minor improvements to form labelling or structure
- Visual contrast or layout refinements beyond minimum requirements

We will continue to review and implement improvements where appropriate.

Compliance status

This website is considered to be partially compliant with WCAG 2.2 level A and AA due to the remaining “Needs review” and “Recommendations” items identified in automated testing.

No known critical accessibility barriers remain that would prevent users from accessing core content or functionality.

Ongoing improvements

We are committed to continuous improvement of accessibility across the website. Regular audits and updates are carried out to maintain and improve compliance with WCAG 2.2 A and AA standards.

Feedback and contact

If you experience any accessibility issues or need information in an alternative format, please contact:
